2023 CABERNET SAUVIGNON

Saint Helena ~ Napa Valley

Alluvium Vineyard

From our remarkable western Saint Helena site, with its alluvial soils, this is our warmest vineyard, highlighting one of Napa Valley's great sub-regions.

The Alluvium embodies everything we love about Napa for growing vines.

The cooler vintage granted this site an extended hang time, yielding an amazingly layered wine.

The nose is opaque and spicy, featuring dark mountain fruit laced with dark chocolate and crème de cassis. On the palate, it's full-bodied with lush sweetness, dissolved tannins, and exceptional texture and weight. Holiday spices, dark berries, and silky tannins unite in a wine that captures Napa Valley at its finest.

Already impressive and showing beautifully, with the structure to evolve over the coming decades.
